IDEALPurifi™ Industrial Air Filtration System

Clean air isn't a perk!
IT'S A COMPETITIVE ADVANTAGE.

Improve air quality, reduce heating costs, and create a healthier, more productive workplace.

**↑ A 10% increase
in PM2.5 exposure
CAN REDUCE LABOR
productivity by 14.8%.* ↓**

* Environmental Research Letters, IOP Publishing, 2024

What's in your air?

Forklift Exhaust

Paper/Wood/Metal Dust

Mold/Viruses/Allergens

Airborne Particulate (PM2.5)

Poor Indoor Air Quality.
REAL BUSINESS CONSEQUENCES.

THE IDEALPurifi™ ADVANTAGE

IDEALPurifi™ continuously filters and recirculates facility air using five reusable MERV 13 filters, capturing harmful particulate while improving comfort and efficiency.

Cleaner Air

Lower Absenteeism

Healthier Workforce

Up to 40% Heating Savings

Reduced Dust Accumulation

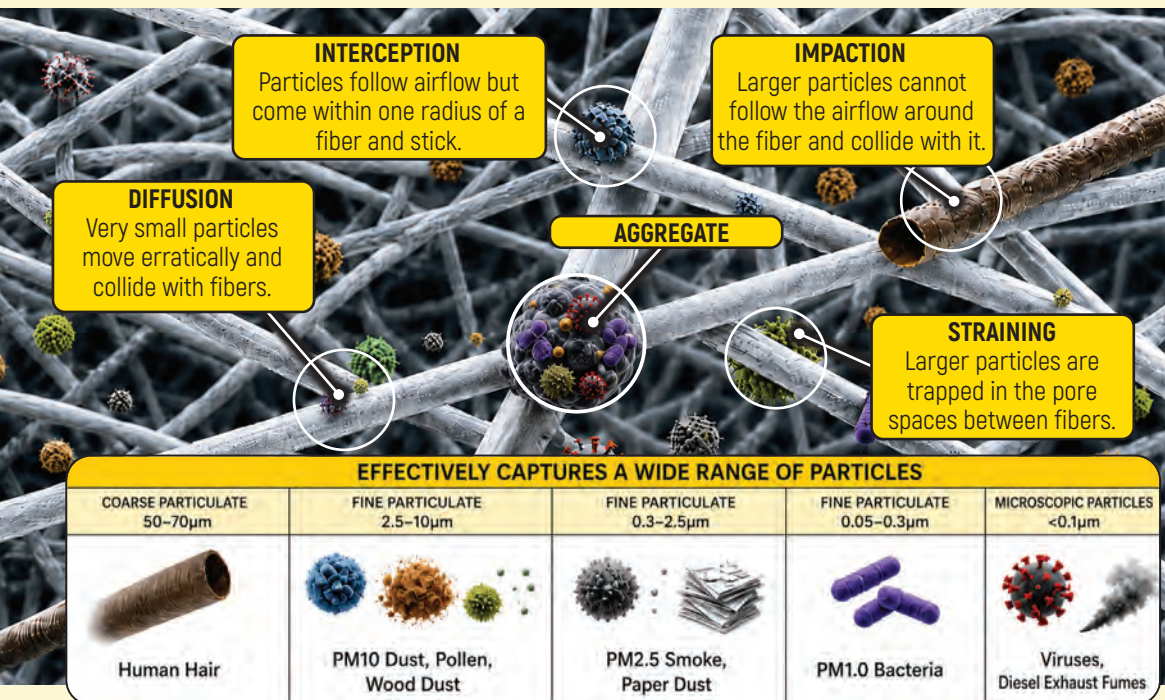

Improved Temperature Consistency

IDEALPurifi™ How it Works

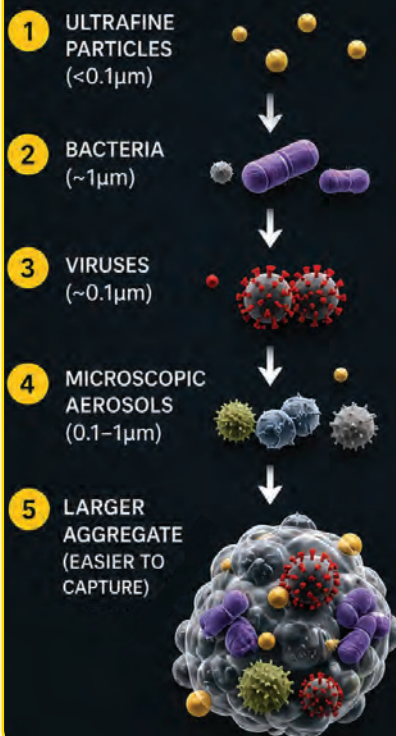

1 FILTRATION

5 MERV 13 Filters capture and filter micro-particles down to 0.3 microns. This high density synthetic fiber filter has multiple layers that capture a wide range of particles.

FROM ULTRAFINE TO AGGREGATE

Tiny particles stick to droplets and build into larger aggregates that are easier to capture.

2 DESTRATIFICATION

Recirculates trapped ceiling air to eliminate temperature layers and create a more consistent environment from floor to ceiling.

3 TEMPERATURE CONTROL

Reduces heating costs by up to 40% while improving worker comfort and productivity.

SIMPLE DEPLOYMENT

Plug-and-play operation, no ductwork required. Compact footprint, rolls into place. Deploys anywhere appropriate power is available – 240V, 480V, or 575V power source required depending on model chosen.

SPECIFICATIONS

Airflow	Up to 15,000 CFM*
Filtration Efficiency	MERV 13
Sound Level	<80 dBA
Power	240V/480V/575V
Unit Dimensions	39" x 40" x 85" (991 x 1,016 x 2,159 mm)
Weight	590lb (268 kg) /620 LB (281 kg)**

*480V/575V Unit. Nominal with clean filters.

** 240V/480V weight is 590 lb (268 kg). 575V weight is 620 lb (281 kg). Unit weight including filters.
